PROFESSIONAL SUMMARY

PROJECT MANAGER / ENGINEER IN-TERN

- Multifaceted construction and design professional with 15 years practical experience in heavy civil and multistory building construction projects. Strong background in construction management and owner representation with recent integration in site and structural design.
- Managed over \$50 million earthwork projects throughout Maine and New Hampshire for clients such as Maine Air National Guard 101st Air Refueling Wing for refueling ramp repairs; Maine DOT for reconstructing 7 miles of Route 2 in Bethel and Gilead; Casella Waste Management for landfill construction and capping in New Hampshire; National Park Service Acadia National Park for campground upgrades and 15KV power to Cadillac Mountain and many more.
- Managed over \$30 million building construction projects for clients such as Eastern Maine Health Care's Webber III. 96,000 square foot Design Build, 6 story Office and Laboratory; Old Town Elementary School 90,000 square foot new construction; DFAS Limestone for DDC Controls change over from pneumatic to electronic; Veterans Administration Togus for Renovations and Chiller installation and worked as Project Engineer on many more building projects.
- Engineering design background throughout construction history for value engineering and change order management in addition to recent design projects; such as the Town of Hampden structural certification for storage equipment, BIA office complex foundations, First Wind structure built in 1950's structural analysis.
- Proficient with design and coordination software such as Enercalc and Risa 3d structural design software packages, WinTR-55 hydrologic software, Suretrac project scheduling
